

## Your Personalized Show Guide

This Show Guide has been customized for you based on the information provided during registration, and on the online Matchmaking portal. Your Personalized Show Guide contains a list of all the exhibitors who have been marked as your favorites, i.e. added to your Expo Plan. It also contains a recommended list of exhibitors. These are exhibitors who have been identified as your best matches using advanced algorithms. To locate an exhibitors booth on the accompanying floor plan map, just look for the serial number listed next to that exhibitors name. Also included in this set is the Calendar, with all your appointments and sessions for the Show.

This Personalized Show Guide is updated in real-time. You can update your Expo Plan and Calendar at any point of time, and generate the Personalized Show Guide again. Just print it out, and take with you to the show.

We wish you a successful show!

## Expo Plan

These are the exhibitors that you have identified as your favorites on the Matchmaking portal.

### Tip:

To locate a favorite exhibitor, navigate to the Hall, and look for the red circle and the number inside.

# Server Error in '/ImageGeneration' Application.

---

## Runtime Error

**Description:** An application error occurred on the server. The current custom error settings for this application prevent the details of the application error from being viewed remotely (for security reasons). It could, however, be viewed by browsers running on the local server machine.

**Details:** To enable the details of this specific error message to be viewable on remote machines, please create a <customErrors> tag within a "web.config" configuration file located in the root directory of the current web application. This <customErrors> tag should then have its "mode" attribute set to "Off".

```
<!-- web.Config Configuration File -->
```

```
<configuration>
  <system.web>
    <customErrors mode="Off"/>
  </system.web>
</configuration>
```

**Notes:** The current error page you are seeing can be replaced by a custom error page by modifying the "defaultRedirect" attribute of the application's <customErrors> configuration tag to point to a custom error page URL.

```
<!-- web.Config Configuration File -->
```

```
<configuration>
  <system.web>
    <customErrors mode="RemoteOnly" defaultRedirect="mycustompage.htm"/>
  </system.web>
</configuration>
```
