

DISPLAY RULES & REGULATIONS

Please be sure to read the following information in its entirety and distribute to your staff and Exhibitor Appointed Contractors. These regulations will be strictly enforced.

DIVERSIFIED COMMUNICATIONS

**121 Free Street
P.O. Box 7437
Portland, ME 04112-7437**

Display Rules and Regulations have been with us since expositions began. Each of us recognize the need for certain limitations but many have never taken the time to understand the intent of such rules, why the rules were written, what the rules are expected to accomplish and most importantly, how you as an exhibitor can use them effectively.

The International Association of Exhibitions and Events (IAEE) Guidelines for Display Rules and Regulations were originally created to promote continuity and consistency among North American exhibitions. Since their introduction, they have become the model for most domestic exhibitions.

This revised edition of IAEE's Guidelines is offered as a resource to create consistent and fair exhibiting standards for events. The text and illustrations have been clarified and updated with the intent of affording exhibitors a maximum return on their exhibit investments.

The tenet on which all show management is based can be summed up as follows:

"All exhibitors are equal regardless of size and should be given an equal opportunity, within reason, to present their product in the most effective manner to the audience."

Experience proves that exposition management must establish rules or guidelines to make this possible while allowing the greatest flexibility within each exhibit.

The exhibitor's responsibility can be summed up far more simply:

"Be a good neighbor."

With these thoughts in mind, please review the rules and regulations outlined on the following pages. By following these regulations you can be reasonably sure you will always be "a good neighbor".

Inline Booth

Inline Booths booths, are generally arranged in a straight line and have neighboring exhibitors on their immediate right and left, leaving only one side exposed to the aisle.

Dimensions

Inline Booths are 10ft (3.05m) wide and 8ft (2.44m) deep. A maximum back wall height limitation of 8ft (2.44m) is generally specified. The maximum back wall height limitations is 8ft (2.44m).

Use of Space

Regardless of the number of Inline Booths utilized, e.g. 8ft by 20ft (3.05m by 6.10m), 8ft by 30ft (3.05m by 9.14m), 8ft by 40ft (3.05m by 12.19m), etc. display materials should be arranged in such a manner so as not to obstruct sight lines of neighboring exhibitors. The maximum height of 8ft (2.44m) is allowed only in the rear half of the booth space, with a 4ft (1.22m) height restriction imposed on all materials in the remaining front half of the booth space. Note: When three or more Inline Booths are used in combination as a single exhibit space, the 4ft (1.22m) height limitation is applied only to that portion of exhibit space which is within 10ft (3.05m) of an adjoining booth.

Corner Booth

A Corner Booth is an Inline Booth at the end of a series of in-line booths with exposure to intersecting aisles on two sides. All other guidelines for Inline Booths apply.

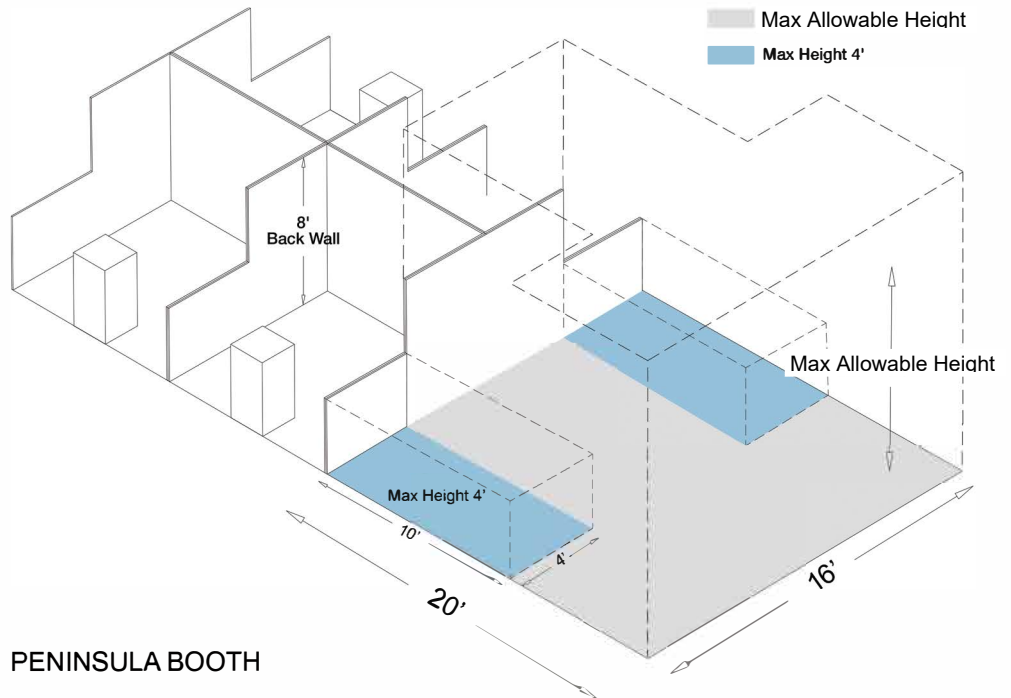

Peninsula Booth

A Peninsula Booth is exposed to aisles on three sides, and comprised of a minimum of four booths.

Dimensions

A Peninsula Booth is generally 16ft by 20ft (6.10m by 6.10m) or larger. When a Peninsula Booth backs up to two Inline Booths, the back wall is restricted to 4ft (1.22m) high within 4ft (1.52m) of each aisle, and 10' (3.05m) out from the back wall permitting adequate line of sight for the adjoining Inline Booths. The maximum height allowance for the center portion of the back wall includes signage, as long as ceiling heights allow. Double-sided signs, logos and graphics must be set back a minimum of five feet (5') (1.52m) from adjacent booths. The back wall facing into the neighbors booth must be devoid of any graphics, text, logos and must be a clean neutral finish.

Max Allowable Height: 16 ft.

Island Booth

An Island Booth is at least 16' x 20' in size and is exposed to aisles on all four sides.

Dimensions

An Island Booth is 16ft by 20ft (4.88m by 6.10m) or larger, although it may be configured differently.

Use of Space

The entire cubic content of the space may be used up to the maximum allowable height including signage as long as ceiling heights allow.

Max Allowable Height: 16 ft.

Table Top / Half Booth

Table Top / Half Booths have only one side exposed to an aisle and are generally arranged in a series along a straight line. They differ from Inline Booths because of their smaller size in depth.

Dimensions

For purposes of consistency and ease of layout and/or reconfiguration, floor plan design in increments of 10ft (3.05m) has become the standard in the United States.

Table Top / Half Booth sizes are 10ft wide and 4ft deep.

Use of Space

Due to the depth of Table Top Booths, it is imperative that display materials are arranged in such a manner so as not to obstruct sight lines of neighboring exhibitors. The maximum height of 4ft (1.22m) applies to the entire booth space and displays, with the exception of the use of the eight foot (8') back drape, from which banners and signs can be hung. If the back drape is used to display banner and signs, they must not exceed 8ft (2.44m) and the items must be hung in a way that does not damage the pipe or drape.

Other Important Considerations

Canopies and Ceilings

Canopies, including ceilings, umbrellas and canopy frames, can be either decorative or functional (such as to shade computer monitors from ambient light or to allow for hanging products). Canopies for Inline or Perimeter Booths must comply with Line-of-Sight requirements and height restrictions. (See “Use of Space” for Inline or Perimeter Booths).

The bottom of the canopy should not be lower than 7ft (2.13m) from the floor within 5ft (1.52m) of any aisle. Canopy supports should be no wider than three inches 3in (.08m). This applies to any booth configuration that has a sight line restriction, such as a Inline Booth. Fire and safety regulations in many facilities strictly govern the use of canopies, ceilings and other similar coverings. Check with the appropriate local agencies prior to determining specific exhibition rules.

Hanging Signs and Graphics

Due to Hilton Midtown low ceiling, hanging banners for Peninsula & Island Booths are limited. If you would like to hang a banner in your Island or Peninsula booth contact Show Management. Whether suspended from above, or supported from below, they should comply with all ordinary use of space requirements. For example, the highest point of any sign should not exceed the maximum allowable height measured from the expo hall floor to the top of the sign/truss. End-cap Booths, Inline and Perimeter Booths are not permitted to have hanging signs.

Hanging Signs and Graphics should be set back 5ft (1.52m) from adjacent booths and be directly over contracted space only.

Approval for the use of Hanging Signs and Graphics, at any height, should be received from the exhibitions or events organizer at least 60 days prior to installation. Drawings should be available for inspection.

Issues Common To All Booth Types

Americans with Disabilities Act (ADA)

All exhibiting companies are required to be in compliance with the Americans with Disabilities Act (ADA), and are encouraged to be sensitive, and as reasonably accommodating as possible, to attendees with disabilities. Information regarding ADA compliance is available from the U.S. Department of Justice ADA Information Line (800) 514-0301, and from the ADA website at www.ada.gov. Some examples of how to design an exhibit for ADA compliance:

- Make exhibits wheelchair accessible by ramping raised exhibit flooring without extending a ramp into the aisle. Note: a standard wheelchair ramp should have a grade no steeper than 1:12. This means that for every inch of rise (change in height), there should be 12 inches of run (change in length)
- Ramp the entry or use hydraulic lifts to trailer exhibits
- Avoid double-padded plush carpet to ease mobility device navigation
- Provide the same attendee experience on both levels of a two-story exhibit
- Offer a signer or other auxiliary hearing-impaired apparatus for sound presentations or have a printed copy of the presentation available
- Run an audio presentation for people with sight problems
- Arrange touch screen displays at a height to accommodate a person sitting in a wheelchair

To avoid heavy fines by the U. S. Department of Justice, exhibitors must adhere to the ADA rules. Exhibits are not exempt from ADA compliance.

Structural Integrity

All exhibit displays should be designed and erected in a manner that will withstand normal contact or vibration caused by neighboring exhibitors, hall laborers, or installation/dismantling equipment, such as fork lifts. Displays should also be able to withstand moderate wind effects that may occur in the exhibit hall when freight doors are open. Refer to local building codes that regulate temporary structures.

Flammable and Toxic Materials

All materials used in display construction or decorating should be made of fire retardant materials and be certified as flame retardant. Samples should also be available for testing. Materials that cannot be treated to meet the requirements should not be used. A flame-proofing certificate should be available for inspection. Exhibitors should be aware of local regulations regarding fire/safety and environment which must be adhered to.

Exhibitors should dispose of any waste products they generate during the exhibition in accordance with guidelines established by the Environmental Protection Agency and the facility.

Storage

Fire regulations in exhibit facilities prohibit storing product, literature, empty packing containers, or packing materials behind back drapes or under draped tables. In most cases, however, exhibitors may store a limited supply of literature or product appropriately within the booth area, so long as these items do not impede access to utility services, create a safety problem, or look unsightly.

Issues Common To All Booth Types *(continued)*

Lighting

Exhibitors should adhere to the following suggested minimum guidelines when determining booth lighting:

- No lighting, fixtures, lighting trusses, or overhead lighting are allowed outside the boundaries of the exhibit space. Exhibitors intending to use hanging light systems should submit drawings to exhibition management for approval.
- Lighting, including gobos, should be directed to the inner confines of the booth space. Lighting is not permitted to project onto other exhibits or exhibition aisles.

Demonstrations

As a matter of safety and courtesy to others, exhibitors should conduct sales presentations and product demonstrations in a manner which assures all exhibitor personnel and attendees are within the contracted exhibit space and not encroaching on the aisle or neighboring exhibits. It is the responsibility of each exhibitor to arrange displays, product presentation, audio visual presentations, and demonstration areas to ensure compliance. Exhibitors should be aware of local regulations regarding fire/safety and environment which must be adhered to.

Special caution should be taken when demonstrating machinery or equipment that has moving parts, cooking equipment with an open flame, or any product that is otherwise potentially dangerous. Exhibitors should establish a minimum setback of 3ft (.91m) and/or install hazard barriers as necessary to prevent accidental injury to spectators. Additionally, demonstrations should only be conducted by qualified personnel. If you are planning on having a demonstration within your booth space it must be approved by show management.

Issues Common To All Booth Types *(continued)*

Sound/Music

In general, exhibitors may use sound equipment in their booths so long as the noise level does not disrupt the activities of neighboring exhibitors. Speakers and other sound devices should be positioned to direct sound into the booth rather than into the aisle.

Exhibitors should be aware that music played in their booths, whether live or recorded, may be subject to laws governing the use of copyrighted compositions. ASCAP, BMI, and SESAC are three authorized licensing organizations that collect copyright fees on behalf of composers and publishers of music.

Please be a considerate neighbor. Event Management reserves the right to shut down any receptions, presentations, or other activities which are deemed obstructive or prohibitive for neighboring booths to be able to conduct business.
