GAYLORD OPRYLAND RESORT INTERNET

Gaylord Opryland Resort Networks/Information
- At Gaylord Opryland, the resort internet is broadcasted across the complete resort and the convention space. The resort and convention space are two different building with the resort internet being setup different for each building.
- Only guest that have a room reservation within Gaylord Opryland (Does not include the Inn) can access the resort internet using the last name on the reservation, and the room number (Please include the letter in front of the room number).
- Internet assistance: In the guest room please just pick up the guest room phone and hit the smiley face button. This will put you in touch with the hotel staff that can get you connected with personnel that can help. In the convention space please call 615-889-1000 and ask for internet assistance when the automated systems answers

Connecting to the Guest Room Resort Internet
- Please connect to the wireless network "Gaylord Guest".
- An internet page will open asking for the last name on the room reservation, and the room number with the letter. Letter in the room number must be capitalized.
- You will be directed to the Marriott page. Once this redirection is done you are connected to the internet.

Connecting to the Convention Resort Internet
- Please connect to the wireless network "Gaylord Resort".
- An internet page will open asking for the last name on the room reservation, and the room number with the letter. Letter in the room number must be capitalized.
- You will be directed to the Marriott page. Once this redirection is done you are connected to the internet.
- Convention space resort internet is just **Basic** internet **(Lite Surfing and Email Checking)**, wireless only, and only allows **6 connections**.
